

Code Generation with Langchain

Enter your query:

Write Python code to load the LLM model using Ollama with 'llama3' and generate an inspirational

Get generated code

Here is your generated code!

```
from ollama import load_ollama
def generate_inspirational_quote():
    # Load the 'llama3' model using Ollama.
    ollama_model = load_ollama('llama3')
    # Generate an inspirational quote by calling the
    generated_text function from the loaded Ollama model.
    inspirational_quote = ollama_model.generate_text("What does
it mean to be fully present in the moment?")
    return inspirational_quote
# Execute the function and print the result.
print(generate_inspirational_quote())
```
