Most Frequently Mentioned Feedbacks

About the Product in the Provided Documents

The most frequently mentioned feedbacks about the product in the provided documents are:

1. Intuitive and Helpful AI Assistant

The AI assistant is very intuitive and helpful in setting up daily routines.

2. Accessibility Issues

The product has some issues with accessibility, particularly with the dark mode having too low a contrast against the background.

3. Data Export and Mobile Performance Issues

The product has some issues with exporting focus session data to other apps, such as Notion or Obsidian. Additionally, the product has some issues with mobile performance, including slow app launch times and reminders not firing on Android when the app is backgrounded.

4. Customer Support Issues

The product has some issues with customer support, including slow response times and unhelpful support.

5. Request for Voice Input Mode and More Control Over Data Retention

The need for a voice input mode for users who want to add notes or update tasks with their voice. Additionally, users request more control over data retention and a clearer privacy policy.
