Primary Issues or Challenges with the Product

Complexity and User Experience

The product has several issues that affect its usability and user experience. For non-tech-savvy users, the product's complexity can be overwhelming. Additionally, the lack of transparency in AI suggestions can make it difficult for users to understand the reasoning behind the suggestions.

Technical Issues

The product also has several technical issues that need to be addressed. The mobile app is too slow, with a 3-5 second delay when launching it. Additionally, the reminders don't always fire on Android when the app is backgrounded.

Export and Customization Issues

The product also has some issues with export options and customization. The export options are inconsistent, and the

product lacks a Linux desktop app, which is a significant limitation for users who prefer to use Linux. Additionally, the product's pricing is considered too high by some users, with a monthly price of $18 being seen as too expensive for solo developers.

Conclusion

In conclusion, the product has several primary issues or challenges that need to be addressed. These issues include complexity and user experience, technical issues, export and customization issues, and pricing concerns.
